IT ALL
 STARTS
 WITH THE
TOWBAR

TOWBAR SYSTEMS

Detachable systems

The removable version enjoys great popularity with increasing optical elegance of the vehicles. When the towball is removed nothing more can be seen from the towbar. For vehicles with parking assistance, this version is definitely recommended.

Fixed systems

Like all Westfalia towbar systems, the fixed towbar is also functional and easy to assemble. It is the budget-priced variant and is particularly suitable for professional use.

Universal HGV towbars

For all vans and light trucks there are universal HGV towbars. It is a towing bracket for very high towed load with a ball plate and the option to use swap systems.

Retractable systems

The retractable towbar is the comfort version of towbars. With the simple push of a button it becomes available – no matter if you want to go on tour with your cycle carrier or if you want to go on vacation with your caravan.

IT'S GENIUS: The towball can become invisible without having to be removed and stowed away. So you can never lose it!

KITS – the perfect combination

Towbars and wiring kits by Westfalia-Automotive provide the perfect partnership. Perfect fitting due to our own development and production, the system offers the highest security. The integration into the wiring system is particularly easy.

Ideal combination

Perfect fitting

Economical assembly
